CONTENTS

Volume 59

GENERAL PHYSICS

Is the physical space empty? *M. F. Podlaha* 451

ELEMENTARY PARTICLES AND FIELDS

Zero-mass scalar field interactions in the Robertson-Walker universe. *R. T. Singh* and *Shridhar Deo* 321

Суперлюминальный характер внутренних областей метрики Керра-Ньюмена. *В. С. Гурин* и *А. П. Трофименко* 371

On the identification of gravitation with a massless spin 2 field. *A. Mészáros* 379

Classical motion of coloured test particles along geodesics of a Klauza-Klein spacetime. *L. Gy. Fehér* 437

NUCLEAR PHYSICS

Inclusive backward proton and deuteron production from ^{40,44,48}Ca isotopes by 1 GeV protons. *J. Erő, Z. Fodor, J. Kecskeméti, P. Koncz, Zs. Kovács, Z. Seres, S. L. Belostotsky* and *V. N. Nikulin* 401

ATOMIC AND MOLECULAR PHYSICS

Approximate self-consistent fields in atoms: an analytical approach. *J. P. Sharma* 287

The coordination of iron in alumino borate glasses containing some alkali or alkaline earth elements. *N. A. Eissa, A. M. Sanad, A. A. El-Saghier, H. A. Sallam* and *A. G. Mostafa* 297

Investigations on the fluorescence decay time of Rhodamine 6G in the presence of Malachite green for the Stokes and anti-Stokes excitation. *C. Bojarski, A. Bujko, R. Bujko* and *H. Cherek* 307

Molecular symmetry in ab initio calculations. III. *F. Bartha, E. Kapuy* and *C. Kozmutza* 333

Molecular symmetry in ab initio calculations. IV. *F. Bartha, E. Kapuy, C. Kozmutza* and *Zs. Ozoróczy* 339

Molecular symmetry in ab initio calculations. V. *F. Bartha, E. Kapuy* and *C. Kozmutza* 347

The 3A band system in the $^{13}C^{16}O$ molecule spectrum. *T. Rytel* and *M. Rytel* 355

OPTICS

Analytic approach for melting and evaporation of a solid by a pulsed laser. *M. M. El-Niclawy, M. K. El-Adawi, A. A. Kutub* and *G. G. Al-Barakati* 291

Reply to the comments of L. Zsoldos [I]. *F. Hajdú* 445

FLUIDS, PLASMAS AND ELECTRIC DISCHARGES

Generation of metastables at 673 K and their deexcitation in flowing gases. *Dj. A. Bošan* and *M. M. Pejović* 239

Generation of metastables in nitrogen glow discharge. *M. M. Pejović, Dj. A. Bošan* and *S. M. Golubović* 273

CONDENSED MATTER

Low energy electron diffraction by thin films. Part II. *K. Stachulec* 247

Self-consistent calculations of the dynamic and thermodynamic properties of rare gas solids. *C. Malinowska-Adamska* 257

Optical and electrical studies on some KDP-type single crystals. *A. A. Kutub, M. K. El-Adawi* and *M. S. Elmanharawy* 279

Radiation stimulated annealing of structural defects in layer structures based on Si and III—V compounds. *O. Yu. Borkovskaya, N. L. Dmitruk, V. Ya. Kiblik, V. G. Litovchenko* and *R. O. Litvinov* 327

Electronic stopping power formula for energetic ions. *G. Bárdos* and *G. M. Gavrilenko* 393

Mechanical impedance of thin viscoelastic plates. *B. Suki* 409

Phase transition in antiferromagnets with magnetic impurities at lattice sites of zero exchange field. *L. Pál* 417

CROSS-DISCIPLINARY PHYSICS

Derived values from intakes for evaluating internal contamination monitoring results. *A. Andrási* and *É. Beleznay* 7

Automated analysis in whole body counting of radiation workers. *E. Havlik, H. Bergmann* and *R. Höfer* 11

Assessment of uranium content in the lungs of nuclear fuel workers at AB ASEA-ATOM. *J. Gustafsson* and *O. Värnild* 15

Modelling indoor exposure to natural radioactive nuclides. *W. Hofmann* and *F. Daschil* 19

Lung dose calculations for inhaled alpha emitters using personal computers. *F. Daschil* and *W. Hofmann* 23

A simple computer program for the estimation of dose, energy and LET distribution of alphaparticles in the tracheobronchial region. *B. Mukherjee* 27

Aerosol deposition calculations with a stochastic lung model. *L. Koblinger* and *W. Hofmann* ... 31

Characteristics and incorporation monitoring results with a whole-body counter. *S. Makra, A. Andrási, É. Beleznay, G. Reischl, Zs. Karika, M. Füzy, Gy. Tarján* and *I. Sinkovics* .. 35

Computer controlled whole body scanner for radiation protection. *J. Urbán, A. Andrási* and *É. Beleznay* 39

Compartment modelling study of stable iodine prophylaxis in relation to the daily iodine supply. *I. Turai* and *B. Kanyár* 43

The use of computers in the environmental doserate monitoring network of Baden-Württemberg. (Germany, F. R.). *R. Maushart* 47

Computer controlled area surveillance system for the TRIGA mark II reactor Vienna. *J. Hammer* and *H. Böck* 51

Data processing in the authorized environmental radiation protection system of the nuclear plant, Paks. *B. Kanyár, J. Laczai, Zs. Szabó* and *L. B. Sztanyik* 55

Evaluation of anomalous local tritium fallout by tree ring analysis. *K. Kozák, T. Bíró, F. Golder, V. Rajner, D. Rank* and *F. Staudner* 59

Statistical evaluation of releases of C-14 from the Vienna TRIGA reactor. *M. Tschurlovits* 63

Dose level measurements during startup of the second unit of the Paks nuclear power plant. *S. Fehér, M. F. Nagy, J. Rónaky, G. Rósa* and *E. Virágh* 67

Computer technics in corrosion product activation research for shut-down dose reduction at Paks NPP. *G. L. Horváth, P. Ormai, T. Pintér, I. C. Szabó* and *T. Radnai* 71

Improvement of telemetric and data acquisition system for environmental monitoring at Paks. *S. Deme, I. Fehér, M. Rövid* and *P. Takács* 75

Fast evaluation of the radiological consequences of possible nuclear accidents. *I. Fehér, S. Deme, L. Koblinger, G. Rósa* and *J. Rónaky* 79

Approximations to evaluate the external dose integral for reactor accidents. *Zs. Szabó, A. Kerekes* and *B. Kanyár* 83

Determining of the neutron absorbed doses in fast neutron fields at the RB reactor. *M.Šokčič-Kostić, Dj. Tomaševic, M. Pešić, D. Antić* and *M. Ninković* 87

A Monte Carlo calculation of the exposure dose due to the radioactive lightning rod. *D. R. Nikezić* and *P. D. Marković* 91

The new low-level laboratory of the Bundesversuchs- und Forschungsanstalt Arsenal, Wien. *H. Aiginger, F. J. Maringer, J. Német, D. Rank* and *E. Unfried* 95

Dose distribution, integral dose and radiation risk in computerized tomography of the skull. *W. Hofmann, H. Rahim, M. Grobovschek* and *H. Mandl* 99

Determination of beta-emitting impurities in radioactive certified reference materials to be used at nuclear facilities. *T. Barta, S. Lueff* and *Á. Szörényi* 103

Fast neutron spectra and transmission measurements. *D. J. Nikolić, M. J. Milošević* and *M. P. Pesić* 107

Dosimetry of radiation during homogeneous experimental irradiation of animals. *R. Kljajić, B. Breyer, E. Horšić* and *Z. Milošević* 111

Beta-dose calculations using Monte Carlo technique. *Á. Petõ* 115

Z80 microprocessor based subroutine system for evaluating nuclear track detectors. *J. Pálfalvi* and *S. A. Durrani* 119

Fast neutron spectrometer based on CR-39 proton sensitive track detector. *G. Dajkó* 123

Algorithms for counting rate—convenient for digital radiation monitors. *A. M. Koturović* and *R. B. Vukanović* 127

Use of computers for the verification of dosemeters. *A. Jakab, M. Péter* and *Á. Szörényi* 131

A model of beta and gamma interaction and Monte Carlo calculation used for the ionization chamber energy dependent response function determination. *M. Šmelcerović, P. Marković* and *M. Stojanović* 135

Microprocessor based radiation monitor with extended possibilities. *V. R. Drndarević, A. B. Milić* and *A. M. Koturović* 139

The use of microprocessors and microcomputers in liquid scintillation counting. *F. Schönhofer* and *E. Henrich* 143

A new option of SAMPO80 (a minicomputer program for gamma spectrum analysis) for detection limit calculations. *P. Zombori* and *F. Steger* 145

Environmental gamma radiation monitoring system with a large volume air ionization chamber. *K. E. Duftschmid, Ch. Strachotinsky* and *J. Witzani* 149

A fast method for the evaluation of complex thermoluminescence glow curves. *Á. Pető* and *L. Benkő* 153

Effect of mathematical evaluation methods of thermoluminescence glow curves on the measured dose. *M. Ranogajec-Komor, B. Vekić, U. Miklavzić, G. Drazić, M. Mihelić* and *I. Dvornik* 157

Experiences of glow curve analysis of LiF detectors. *I. Uray, E. Rose, M. Hintzen* and *H. J. Probst* 161

A TLD-04B interfaced with HP-4ICV. *P. Zaránd* and *B. Szabó* 165

LET-dependence of the trapping parameters in TLD-100 determined with a computerised curve fitting method. *N. Vana* and *M. Motallebi* 169

On-line glow curve recording with a computerised TLD system. *P. P. Szabó* 173

A computer aided method for discriminating between beta and gamma doses in a thick thermoluminescent dosimeter. *W. Rossbander* and *P. Sahre* 177

Computer assisted evaluation of dose measurements of the hand. *I. Polgár, E. Katona* and *A. Somogyi* 181

Use of personal computers for an integrated personnel dosimetry system. *R. Ouvrard, R. Hochmann* and *E. Gann* 185

Ten years experience with a large computerized TLD — personnel monitoring service. *K. E. Duftschmid* 189

Computer aided evaluation of thermoluminescence dosimeters in routine control of occupationally exposed persons. *P. Brunner* and *O. Bobleter* 193

Algorithm for assessment of mean annual gonad dose and genetically significant dose from the data of personal dosimetry. *M. Tomašević* and *R. Radovanović* 197

A model of standardizing dosimetric data collection for statistical analysis on occupational exposure. *M. I. Litido* and *A. Tacconi* 201

Application of an automated system for evaluating the records of individual monitoring external radiation exposures. *Gy. Thék* and *I. Bojtor* 205

A computer based personal data recording system for occupationally exposed persons. *M. Tschurlovits, E. Seymann* and *H. Slanetz* 209

Microcomputer data processing in a TLD automated system for personnel dosimetry. *M. Prokić, S. Glodić* and *D. Hadžić* 213

Computer recording, evaluation and analysis of personal and working place radiation doses. *J. Losonczi* 217

Some results in computer calculation of aquatic dispersion of radionuclides released in the river. *S. Lazić* and *Z. Vuković* 221

Application of computers in evaluating the distribution of radionuclides released into surface waters. *Lj. Hadžievski, T. Anovski, D. Kačurkov, B. Minčeva, B. Andonovski* and *L. Nikolovska* 225

Model calculations for transport of H-3 in groundwater systems. *W. Papesch* and *D. Rank* 229

Transport of radionuclide through the soil. *Lj. Knežević* and *Z. Vuković* 233
